

# Generals Die In Bed Ashtyn

## Chapter 1

The title Generals Die In Bed means that the generals don't die in the frontlines. They die from sickness, age or something else.

This is because they don't fight in the war or the frontlines. They sit back where they are safe and give people orders. "Yeah, but he'll never die in a lousy trench like Brownie and them did. God, no. Generals die in bed." (pg. 96).

This quote from the book is exactly what I explain. A general will most likely never die when they're fighting (at battle). They will always be kept somewhere where they would be safe. This is important because we realize that while all the soldiers are out fighting and risking their lives, the generals are "behind the scene" watching everything unfold and away from the battle.
